Morehead State University's Preparing Tomorrow's Teachers to Use Technology grant is presenting a day-long Symposium on Handheld Technology for P-16 teachers. We would very much like for your products to be displayed at the exhibit hall during the symposium. Teachers have requested projectors, handhelds, laptops, probe equipment for sciences, and alternatives to SMARTboards to be displayed and demonstrated.

I have attached a flier for the symposium. We anticipate between 75 and 100 participants. Please LMK by March 29 if your company would like to display information or would like to send info for distribution. Thank You!

Dr Lesia Lennex
